VOIP TELEPHONE SYSTEM: NEIGHBORHOOD ADULT HEALTHCARE P.A.

Techville is now on the process of setting up and installing a brand new VOIP Telephone System in Neighborhood Adult Healthcare P.A. in Richardson, TX. Dr. Naeem Sajjad, MD practices internal medicine at this location was looking for a phone system design that will work effectively in his office setting. After a thorough consultation with Dr. Sajjad, Techville proposed a system design that will incorporate the advance technology that is most suitable for his needs. The VoIP phone system equipments manufactured by AYC Telecom that are being installed in the location are both reliable and cost effective.

Techville is a value-added partner of AYC Telecom. AYC Telecom has been a worldwide leading provider of the VoIP telephone system for years. Working together, Techville is bringing the advance, effective, yet affordable communication solutions designed specifically for small businesses. Say goodbye to high costs for conventional telecommunications systems. Do not pay double for telecom and internet services. Say Hello to VoIP telephone System by AYC Telecom!

Techville Computer Centers provides the VoIP solutions for your communication needs with full installations, support, and configurations for your business. With the packages that we offer, we assure that you are choosing the optimum level of functionality and comfort currently offered by VoIP in terms of quality, security, and equipment.

For More information about the VOIP phone system and the business packages that we offer, please visit www.techville.com or call us now at [\(214\) 739-7033](tel:2147397033).

BENEFITS OF USING DIGITAL SIGNAGE SYSTEM

1. **Increase Sales** - Marketing researches show proven results of increases in sales with Digital Signage in stores. More and more retailers are starting to replace traditional signs with digital signage.
2. **Flexibility** - Instead of one static image, digital signage can highlight many items and feature multiple slides or dynamic graphics to capture the attention of customers.
3. **Time Savings** - No more climbing to step in lettering, waiting to print/ mail or pick up! With digital signage, contents can be sent via the Internet or played from a media card. Changes can be created and sent using a PC within minutes. Price-points, video and graphics can be changed anytime.
4. **Cost Savings** - Since there is no more shipping or print processing, you save! All changes can even be made in minutes with no additional cost at all!

Call us now at **(214) 739-7033** to schedule a product demo/presentation.

TIP OF THE MONTH

CARING FOR YOUR PL2100XL SCANNER

Regularly clean the object glass of the scanner and the transparency adapter to prevent dirt or smudge build-up that may reduce the quality of your scanned images. Before you clean the object glass, make sure the scanner power is off and the power cord is unplugged. Clean the object glass of the scanner and the transparency adapter with a soft damp cloth and a mild detergent or alcohol.

Note: Avoid spraying cleaning fluid directly on the object glass. This may cause the liquid to penetrate the seams around the glass and contaminate the mirrors and lenses inside the scanner. Spray the liquid on the cleaning cloth then wipe the glass clean.

Be sure that nothing covers the calibration area. It is important to keep the calibration area clean since dust or smudge marks on the glass will reduce the quality of scanned transparencies. Make sure the transparency fits in the scanning area. Do not leave transparencies on the object glass of the scanner for excessive periods of time. The warmth of the scanner and transparency adapter lamps may cause them to deteriorate. Please, use the Frame holder to secure the transparencies for scanning.
