Techville News

TECHVILLE SETUP DIGITAL MENU SYSTEM FOR J.S. CHEN CHINESE RESTAURANT IN W. PLANO, TX.

Techville is recently working with J.S. Chen Chinese Restaurant to establish a digital menu system for their West Plano location. Techville took series of photographs and developed a menu layout and design that fits their specific preference. J.S. Chen serves a variety of authentic Chinese cuisine and dim-sum dishes. We have helped them develop a menu system that enhances their dishes and their environment. The menu slides are displayed on a large LCD screen the take out/cashier area to help customers visualize available dish selections in a more dynamic approach. The digital menu system will complement the traditional paper menu and help update their original fixed picture displays. J.S. Chen is quite pleased with the digital menu system that we have created. We are also excited about helping J.S. Chen enhance their business with our digital signage solutions.

Digital Signage Advertising is one of the newest technologies that have been proven to work effectively in the field of marketing and advertising. Take on this opportunity to display your advertisements in the largest and the best Asian supermarket in the Dallas Area. Techville currently offers the complete package that is flexible, affordable, and will suit any of your marketing needs. We currently have different airtime packages, sizes, and we even offer the complete video/slideshow presentations making and content management for our clients to ensure the effectiveness of their advertisements.

SUCCESS STORY: DALLAS CALCO TOFU

Techville has recently developed advertisements for Dallas Calco, a local tofu manufacturer to display on our digital signage advertisement system in Asia World Market. The advertisements were created specifically to advertise Dallas Calco's needs to boost their sales and introduce customers to their new packaging. Dallas Calco is also running a few promotions and demos in addition to these advertisements. The overall result has been positive and we are looking forward to further accommodate their IT needs.

TIP OF THE MONTH

GENERAL CLEANING TIPS FOR YOUR PC

You can save your computer maintenance cost if you clean your computer on the regular basis. This will improve the cooling and performance of the computer components. Your computer components could damage, if you do not keep it clean on periodically basis, because dust is the main cause to heat up your system and heat link to hardware failure.

- Never place your computer on the ground, always use computer table or shelf for this purpose.
- To clean computer case first unplugs your system power from the electrical outlet. Remove all cables and connectors from the back side of your computer.
- Now blow the air around all the hardware components and keeping away your blower nozzle 4 to 5 inches away from main board components. You can use vacuum cleaner also for this purpose but compressed air is the better solution to clean a system.
- At the end using lightly dampened cloth or spray any cleaning fluids on the computer case and use paper towel to dry it.
- Never clean inside computer components or other circuit board with damp or wet cloth.
- Always be careful to eat or drink around the computer.
