The Future of Communication

Say goodbye to high costs for conventional telecommunications systems. Don't pay double for telecom and internet services. Say Hello to Voice-over-IP telephone System by AYC Telecom!

The advantages speak for themselves:

- Move your office or change your domicile and make telephone calls immediately without any hassles.
- Know who is available at all times.
- Receive calls when you're absent.
- Parallel use is possible with your existing telephone systems.

Techville Computer Centers provides the VoIP solutions for your communication needs with full installations, support, and configurations for your business.

VoIP Products

With these VOIP telephones, you are choosing the optimum level of functionality and comfort currently offered by VoIP in terms of quality, security, and equipment.

IPcts from AYC Telecom

The complete IPcts system, which combines a Telephone PBX system with the functionality of an IP Telephony system, encased in a 1U 19" chassis being on a rack, wall or desktop (mountable). So it can be installed into any existing or 'green field' environment.

SNOM 300

The basic model of the SNOM business telephone family, the SNOM 300, fulfils the most important requirements of VoIP telephony and additionally offers numerous functions that are indispensable in the business world.

SNOM 320

Ideal for the office and everyone who spends a lot of time on the phone, the SNOM 320 is an affordable, yet powerful SIP business phone with built-in, full duplex speakerphone and three-party conference bridging.

SNOM 360

The SNOM 360 is designed for maximum efficiency in the everyday business environment. Dedicated keys provide you with direct access to the functions for audio and call control. Context-sensitive menus offer you many additional options depending on your current work requirements. The graphical display can be tilted for your optimum reading angle.
